Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 31 May 2007.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of group I, claims 15-27 in the reply filed on 5/31/07 is acknowledged. The traversal is on the ground(s) that Tapan does not disclose a sound-damping panel. This is not found persuasive because Tapan et al teach a fiber fleece can be used as a sound dampen panel.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 15-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Lemelson (US 3,437,783).

Lemelson discloses a method of producing a metallic composite comprising the steps of providing metallic fibers and compressing and fusing the fibers in a single step. The fibers are derived from bulk material. The opposite sides of the metallic composite are fused with wire meshes. The welding is carried out in inert gas (figures 1-4, col. 3, line 53- col. 4, line 14).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 21-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lemelson (US '783).

Lemelson discloses the claimed invention above, but lacks the mentioning of pulse fusing less than 10s and pressure bonding of between 0.1 N/mm² to 10 N/mm².

However, Lemelson discloses pressure bonding and pulsing (col. 3, line 31). Therefore, it would have been obvious to pressure weld and pulse weld between 0.1 N/mm² to 10 N/mm² and less than 10s respectively, since such range would involve routine experimentation.

Inquiry

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Len Tran whose telephone number is (571) 272-1184. The examiner can normally be reached on M-F, 8:30 - 5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jonathan Johnson can be reached on 571-272-1177. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
